Eera RPA Training Certificate

Eera is a Finnish management consulting company, which is focused on creating value from disruption to its customers. RPA and automation of knowledge work is one of the focal areas of Eera's business. Eera has been one of the pioneers in creating RPA business in Finland and currently also in Latin America and Asia.

The following certificate is a proof of training done with studying the possibilities of RPA and especially the technical tools. The RPA field is currently constantly evolving and the exercises of the Eera's training are done with both UiPath and Workfusion tools, which are the most important emerging providers on the market. With these two tools the training focuses on three tasks: understanding the possibilities of RPA in automation of knowledge work, studying the individual capabilities of the different software and comparing the different tools.

The workload of the RPA training is divided with the following time estimations:

Introduction to RPA	10 h
UiPath Training	30 h
Workfusion Training	30 h
Comparison of the tools	30 h
Final Projects with tools	30 h
Final Presentation and comparison of the tools	10 h
Total	140 h

Trainee **Nguyen Khac Hoang** has completed the training with distinction on 8.10.2017
